Caller would like to discuss (a) referral Writer has advised caller of a callback from within 24 hours.

Patient: Viktoriya A Pulliam

Caller Name (Last and first, relation/role): self

Name of Facility: na

Callback Number: 503-208-1326

Best Availability: anytime

Fax Number:

Additional Info: pt had a rheum referral sent by Carlson, Hans and it was received 5/1, pt referral was canceled. Pt states she has been trying to get in to see rheumatology for 4-5 months now and there has been new issues each time and that she had not been reached about any scheduling or cancellation, and that she had not heard from her other provider Carlson on any cancellation either. Pt would like to speak with someone on rheum team directly as to why her referral was canceled.

Did you confirm the message with the caller: Yes

Is it okay that the nurse communicates your response through MyChart? No

Urgent Care Visit Note

Subjective
Chief Complaint
Chief Complaint
Patient presents with

- Headache

  Sore throat for abour 3 months now, headache for a couple of weeks and lost her voice 4 days ago, and her ears ring off and on

History of Present Illness
Viktoriya A Pulliam is a 33 y.o. female presenting for complaint of sore throat, headache, loss of voice and bilateral ear discomfort. Patient reports a longstanding history of sore throat over the past 3 months. Patient was seen by ENT specialist in her hometown of Gillette Wyoming recently. At this visit patient was diagnosed with GERD and started on Protonix. This was started yesterday, patient unsure if symptoms have improved with use of Protonix. However, over the past few weeks she has had headache, over the past 4 days she has had loss of voice and recently she had onset of ear discomfort. She endorses intermittent chills but denies objective fever at home. Endorses mild nausea. Denies any vomiting. No other complaints at this time.

Assessment/Plan
Diagnoses and all orders for this visit:

Clinical Notes (continued)

Sore throat

- Rapid Strep A PCR Swab

On exam today patient is hemodynamically stable and neurologically intact. She is showing no signs of distress. She is not toxic appearing. ENT heart and lung exam all unremarkable. Do not suspect bacterial infection at this time. Patient advised to continue with treatment plan as discussed with ENT. Advised to continue with Protonix for her 3-month onset of sore throat. Also advised to continue with Tylenol for pain control as necessary. She is advised to return to clinic or seek immediate medical evaluation for any worsening of current symptoms or new onset of symptom concern. Advised to follow up with primary care provider and/or ENT for reevaluation and continuation of care. Patient verbalizes full understanding of current plan.

Patient Education: Ready to learn, no apparent learning barriers were identified; learning preference includes listening. Explained diagnosis and treatment plan; patient/caregiver expressed understanding of the content. All questions answered.
